Applied Physics, 2009, 753 pages, Dale Ewen, Neill Schurter, P. Erik Gundersen, 0135157331, 9780135157336, Pearson Prentice Hall, 2009

Applied Physics, Ninth Edition (formerly Physics for Career Education) provides comprehensive and practical coverage of physics for students needing an applied physics approach or considering a vocational-technical career. It emphasizes physical concepts as applied to industrial-technical fields and uses common applications to improve the physics and mathematics competence of students. The text is divided into five major areas: mechanics, matter and heat, wave motion and sound, electricity and magnetism, and light and modern physics. This new edition includes more than 120 mostly metric problems and some problems of interest to automotive/diesel and construction students and more than 60 new photos! For individuals preparing for technical or industrial careers.
